

vCom Solutions Green Initiatives

Paper invoices account for the loss of millions of trees annually. Telecom carriers typically send multiple invoices, by location and/or product, rather than a single invoice for all services and locations. Some do not give the customer the option of suppressing details, which results in even more waste.

vCom helps you “go green.” By consolidating our customers’ invoices down to one, and delivering that single invoice electronically, we save countless reams of paper. Our electronic bill process through our web portal, vManager, saves 13,000 sheets of paper per month alone. vManager also provides all of the dashboards, reporting, drill down, and slice-and-dice capability that eliminate the vast majority of report creation.

vCom offers a program to recycle your retired mobile phones, free of charge. And we appreciate each of our new customers with a tree planted in their honor.

vCom Provides:

- A single electronic invoice across all carriers, locations and services
- Automated invoice approval workflow to eliminate paper processing
- Business intelligence tools that reduce report creation
- No charge mobile phone recycling
- Reduction in your company's environmental impact
- The confidence of working with a Certified Green Business

About vCom Solutions

vCom Solutions revolutionizes the way enterprises manage their entire telecom lifecycle. vCom customers gain control over inventory, expenses and carrier relationships, achieving better business intelligence that drives profitability. vCom's Telecom Management as a Service (TMaaS) solution includes a suite of cloud-based telecom management software tools, complemented by a full portfolio of professional services.
