

We Manage What You Shouldn't

## Solutions for the Legal Industry

Law firm IT leaders are key players in a high stakes game – they must ensure effective data governance, deliver increasingly efficient eDiscovery tools, and provide efficient technology. At the same time, they face numerous challenges – little tolerance for downtime, the need for quick and secure access to massive amounts of data, and a demanding clientele of expensive professionals. The stability, efficiency and security of their technology environment are mission-critical.

Maintaining a sound technology environment is essential. Time and resources are limited. So it can be difficult for legal organizations to devote IT staff to addressing the cost of the network, managing the various suppliers, and optimizing the underlying technology. Choosing the wrong data network and collaboration services, or mismanaging a mobile workforce significantly impacts productivity and ultimately the bottom line. But devoting IT staff to address these problems only drains resources and harms productivity.

vCom manages the entire technology lifecycle for Wireline, Mobile, Collaboration and Cloud services. From procurement to support to analysis, vCom helps law firms select the right technology, gain visibility and control over their spending and inventory – saving time and money.

*“vCom has helped ease the burden of tracking our inventory, our carriers, and most importantly managing our costs.”*

CIO, Littler Mendelson

## Success Stories

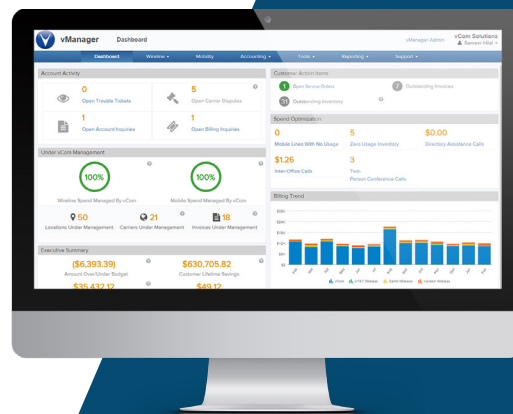

# vCom Delivers

- Savings of **20—30%** of your total technology costs
- A single platform for managing all technology expenses, with automated G/L coding and A/P posting reports
- Visibility over procurement, inventory, spending, and contracts through a cloud-based platform, vManager
- Elimination of billing errors and control over technology expenses
- A single point of contact for all technology needs, including procurement, support, and billing disputes, regardless of provider, through a dedicated team of specialists

## Our powerful, cloud-based application vManager features:

- Technology Lifecycle Management for Wireline, Mobile, Collaboration, and Cloud
- Consolidated and standardized invoices across products and carriers
- Inventory management with historical activity tracking and access to all of your contracts
- A centralized view of procurement activities across all locations
- 100+ spend analysis reports
- Automated G/L coding and cost allocation tools to eliminate manual processes
- Customized A/P posting reports for easy upload into your accounting system

*“vCom’s cloud-based software solution provides comprehensive visibility and control over our telecom environment and spend, and it gives us a unique understanding of our own tolerance for downtime, redundancy and uptime across our network.”*

- CIO, Duane Morris

## About vCom Solutions

We’re revolutionizing how technology expenses are managed. We’ve been leading this quiet revolution for 15 years, delivering the products, platform, and people to manage our customers’ business technology and deliver visibility, control, and cost savings. Let’s get started.
